PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of professional experience designing, building, and shipping production-grade web applications. Currently developing QuantLab, an AI-driven trading intelligence platform integrating Google Gemini 1.5 Pro for real-time predictive analytics, delivered end-to-end from database design through REST API development to responsive UI. Skilled across React, Node.js, TypeScript, .NET and C#, with hands-on cloud experience (Microsoft Azure, AWS) and a track record of measurable results including 68% API latency reduction, 75% faster product search, and 99.9% production uptime. Master of Engineering graduate from the University of Windsor, based in Leamington, Ontario, and available immediately.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C#, Python, SQL, HTML5, CSS3

Frontend: React, Redux, Capacitor, Tailwind CSS, Vue.js, Responsive Web Design

Backend: .NET, ASP.NET Core, Node.js (Express, NestJS), REST APIs, RESTful APIs, Microservices Architecture, WebSockets

Databases: Microsoft SQL Server, MySQL, MongoDB, Redis, SQLite

Cloud and DevOps: Microsoft Azure, Amazon Web Services (AWS), Docker, CI/CD (GitHub Actions), Git

AI and LLM Tooling: LLM API Integration (Google Gemini), Prompt Engineering, Retrieval-Augmented Generation (RAG), AI-Assisted Development Workflows

PROFESSIONAL EXPERIENCE

Independent — Full-Stack Software Engineer (QuantLab Trading Intelligence Platform)

Windsor, ON (Remote) *Jan 2023 – Present*

- Independently architected a full-stack AI platform end to end (database, API, UI), integrating Google Gemini 1.5 Pro to deliver real-time predictive analytics and risk modeling
- Designed and built RESTful API services in TypeScript and Node.js with structured JSON contracts and a custom caching layer, cutting response times on high-traffic endpoints
- Engineered a high-performance Monte Carlo simulation engine in TypeScript, executing thousands of stochastic paths to forecast outcomes and calculate dynamic confidence intervals
- Built a multi-source real-time data pipeline using WebSockets and external APIs, with a custom caching layer and memory-safe SQLite persistence
- Delivered a cross-platform web and Android experience via Capacitor (React 19 front end) with production-grade data visualizations
- Packaged and signed the Android App Bundle (AAB) as Quant Trade Analyzer and submitted it to Google Play for closed testing (release in review, Nov 2026)
- Shipped through CI/CD pipelines (GitHub Actions) with version-controlled Git workflows and unit-tested core modules

Bulls Market Inc — Department Manager (IT Systems & Operations)

Windsor, ON *May 2023 – Present*

- Triage, reproduce, and resolve production system faults across POS platforms, databases, and kitchen display systems, reducing technology-related downtime by 40%
- Architect system integrations and SQL automation between POS platforms and corporate databases using Microsoft SQL Server, sustaining 99.9% uptime across 1,000+ daily transactions

- Write and tune SQL queries against production databases to support reporting and operational integrations
- Provide hands-on technical support to end users in a high-volume production environment

Edukite Learning — Full-Stack Software Engineer

Vadodara, India *Nov 2020 – Nov 2021*

- Built and shipped user-facing features end-to-end, engineering custom Moodle LMS plugins and high-performance RESTful APIs with Node.js and MySQL, increasing learner engagement by 25%
- Tuned SQL queries and implemented Redis caching, cutting API response times by 68% (800ms to 250ms) on high-traffic endpoints
- Led migration to a microservices architecture, improving scalability by 50% and reducing average page load time from 2.4s to 1.2s
- Performed code reviews and authored technical documentation and architecture diagrams, reducing new developer onboarding time by 40%

Techie Computer — Full-Stack Software Engineer

Anand, India *May 2019 – Jun 2020*

- Developed 12+ full-stack e-commerce applications with React and WordPress from database to UI, generating $500K+ in client revenue and processing $2M+ in secure transactions
- Integrated 10+ third-party payment APIs (Stripe, PayPal) and shipping SDKs with robust error handling, achieving 99.8% uptime
- Optimized MySQL schemas and indexing for catalogs of 5,000+ SKUs, improving product search performance by 75% (2.5s to 0.6s)

EDUCATION

Master of Engineering (M.Eng) in Electrical and Computer Engineering

University of Windsor — Windsor, Ontario, Canada *Jan 2022 – Apr 2023*

Bachelor of Engineering (B.Eng) in Computer Engineering

Gujarat Technological University — Ahmedabad, India *Aug 2016 – Aug 2020*

LANGUAGES

English — Advanced
